

Appendix: Activism-memory nexus applied to Feminist SF fandoms

Activism-memory nexus	Social conditions of feminist collective memory	Definitions linking sociology of culture & Memory studies	Sections of the paper
<u>Memory in activism</u> <i>The role of memory in new acts of contention</i>	Similar <u>narrative patterns</u> (epiphany and feminist waves narratives, fan canonization, etc)	Feminist conversation tends to be self-referential, which implies technologies of inscription and registering.	Symbolic autonomy (see 3) Collective memory building (see 5)
<u>Memory activism</u> <i>The contentious actions to promote certain memories</i>	Agreement on a <u>duty to remember</u>	Awareness of the role of collective memory leads to preservation strategies such as commemorations or dedication to fan-history tasks.	Herstory (see 6)
<u>Memory of activism</u> <i>Remembrance of past struggles (transmission of repertoires)</i>	<u>Consensus</u> on shared representation (continuity between mobilizations and activist traditions)	Minority situations tend to give an increasing role to collective memory as an instance of legitimization and preservation of collective goals, tactics, and organization.	Abeyance structure (see 7)
